SUMMARY

This is a report of forest production in Nova Scotia for the calendar year 1984, based on data collected by the Operations Branch of the Department of Lands and Forests. Compiling, editing, publishing and distribution were done by the Program Planning Branch.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1984 regardless of whether the wood was purchased, custom-sawn or produced by the mill owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling.

Production data is concerned only with wood of Nova Scotia origin.

Production is shown as accurately as possible by county of origin. Resawn volumes are left out of this report to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 3 253 232 m³, solid wood equivalent, up 49% from 1983. Sawlog volume increased by 19% from 1983, amounting to 992 476 m³ equivalent. Round products increased 70% to 2 270 756 m³ equivalent.

Production of pulp chips from sawmills increased by 10% from 1983.

Compared to 1983, increases were reported for residue chips, pulpwood, boxwood, railway ties, mine packs, laths, pit props and softwood lumber. Decreases occurred in hardwood lumber, mine packs, shingles and poles and pilings.

The pulp and paper segment of the industry is composed of five mills: a kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

The total number of firms operating all types of sawmills decreased from 411 in 1983 to 407 in 1984.

The number of firms producing over one million board feet during 1984 was 45, one more than in 1983. There were 352 firms producing less than one million board feet per firm compared to 313 in 1983.

Of the smaller producers 221 produced 100 Mfbm or less in 1984.

Firms producing over one million board feet per firm accounted for 13% of the number of firms and produced 94% of the lumber and boxwood.

See "List of Sawmill Owners and Materials Produced - 1984 Forest Products Directory" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands and Forests. Large Private owners provided data for private ownerships of over 1,000 acres per owner. Small Private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
